Overview:
This course examines how race has functioned as an organizing principle in the social life of health and disease in the 19th and 20th centuries in the United States and beyond. Beginning with a critical look at scientific and medical “objectivity,” we will trace the ways in which the intersections of race, disease and health have shaped and been shaped by larger social and historical processes, including immigration, settlement, assimilation, labor exploitation, colonialism, imperialism, and globalization. In so doing, we will explore how modern institutions and discourses have constructed particular populations as victims and/or carriers of disease and others as “sanitary citizens.” As we cover how race, as well as the intersecting categories of gender, class, sexuality and nation, affects both the unequal distribution of diseases and unequal access to medical treatment, we will also consider the human rights and social justice consequences of these phenomena.

Creating a learning environment: Only a portion of what you learn in this course will be from the instructor and the readings. Your classmates will play an instrumental role in your learning experience. In order for this class to be successful, you need to come to class prepared to share your ideas. The more involved you become, the more you will gain. Support your opinions with what you learned in the readings, prior discussion, and lecture. Listen carefully to others before you decide where you stand in relation to their argument and consider how to respond in a respectful and productive manner. Please also refer to UCSD’s Principles of Community, http://www.vcba.ucsd.edu/principles.htm.

Logistics and Policies

You can reach me by email, in my office hours, or by appointment at any time during the quarter. I respond to students’ emails by 10am every weekday; I do not answer students’ emails on weekends.

I do not accept late assignments or assignments submitted electronically. In case of a medical/personal emergency, you must produce a doctor’s note or other documentation in order for an exception to be made.

Please complete the readings by Monday (Wednesday at the latest) the week they are assigned, and bring the text(s) we are covering that week to class.
This syllabus is subject to change; any changes will be announced well in advance in class or by email.

I would prefer that you do not use computers during class sessions, even to take notes. If this is a problem for you, please let me know and we can discuss accommodations.

Turn off phones and refrain from text messaging during class. If I notice you texting, I will ask you to leave the classroom and that will count as an absence.

**Grading and Course Requirements:**
- Attendance and Active Class Participation: 20%
- Four Quizzes: 20%
- Five-Page Paper: 25%
- Final Examination: 35%

*Attendance and participation constitute a significant portion of your grade. Arrive to each class session on time and stay for its duration. Tardiness and absences will be noted and result in the lowering of your grade.*

*Active participation means thoughtful engagement in the readings/lectures, meaningful contributions to class discussions, and respectful collegiality toward your classmates and instructor. Visits to my office hours will also count toward class participation.*

*During the course you will take four brief quizzes consisting of five identifications drawn from the reading and lectures. They will not be “gotcha” IDs; anyone keeping up with the reading and paying attention to lectures can expect to do fine on the quizzes.*

*The final exam will consist of both short and long essays. It will focus primarily on the second half of class, but will ask students to integrate concepts and perspectives covered in the first half.*
